Lockhart Police Department

Annual Racial Profiling Comprehensive Report: 2021

Introduction

This report contains the 2021 motor vehicle traffic stops data compiled by the Lockhart Police Department. The department maintains a strong stance against racial profiling; the policy and practice are to provide law enforcement services and to enforce the law equally and fairly without discrimination toward any individuals or group. In 2021 Lockhart Police department had a complaint process where any allegations of racial profiling can be brought forward for investigation.

This report contains the following:

- Motor Vehicle stops by year and by race/ethnicity
- Whether race or ethnicity was known prior to stop
- Was search conducted
- Result of searches by year, by race/ethnicity and by type of searches
- Search results (hit rate) -by year and by race/ethnicity

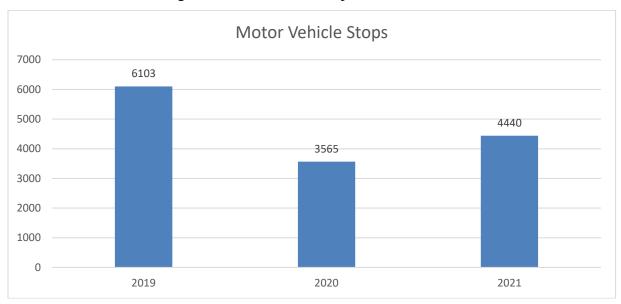

Changes in this year's reporting:

There were no changes in 2021 to Racial Profiling policy or report methodology. The racial profiling law's definition for "race or ethnicity" condensed to include only: Alaska Native or American Indian; Asian or Pacific Islander; Black; White; and Hispanic or Latino. T.C.O.L.E. does not establish guidelines on how to report races outside its definition. Therefore, LPD has chosen to exclude these stops from the report to T.C.O.L.E. to preserve the actual counts of the reportable races.

This full report will continue to provide a more comprehensive representation of LPD stop and search data and include a comparative analysis of all traffic stops.

Searches resulting from motor vehicle stops:

The number of searches resulting from motor vehicle stops increased from 199 in 2020 to 204 in 2021. The search rate (searches as a percent of stops) was 4.5% during 2021, down slightly from 5.5% during 2020.

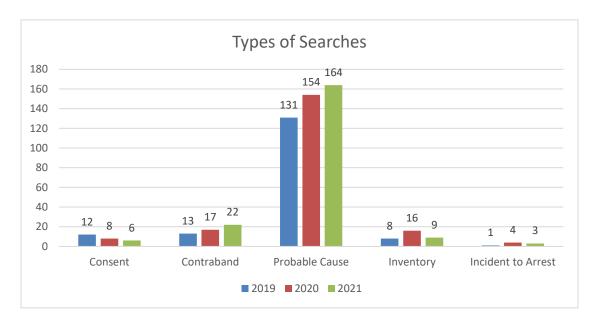

Search type and race/ethnicity.

53% of those searches were Hispanic drivers (109), 30% of those searches were White drivers (61) and 16% of those searches were African American drivers (33).

The chart below shows the types of searches.

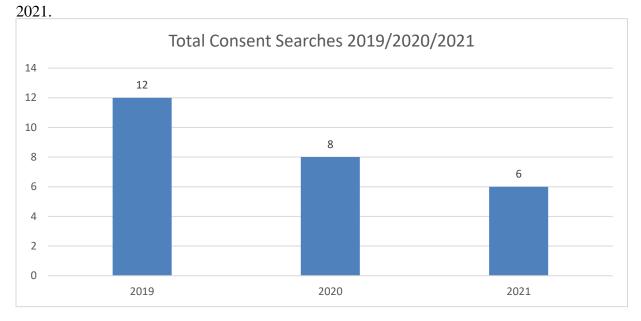

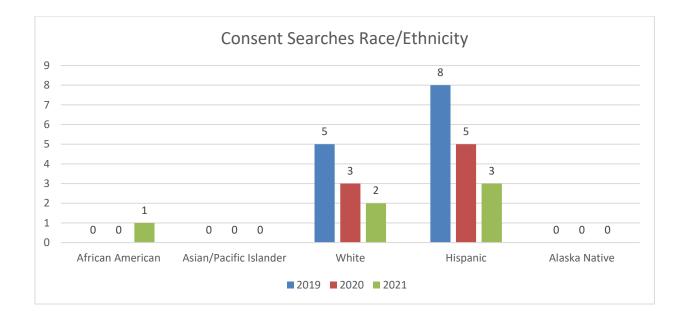

Consent searches resulting from motor vehicle stops.

Searches that result from motor vehicle stops can be categorized as consent or non-consent searches:

- Consent searches are discretionary searches they occur when the officer asks for permission to conduct the search and the citizen consents to be searched. Under most circumstances, a driver must give permission for a search in writing before a consent search can be initiated.
- Non-consent searches are non-discretionary searches and occur after an arrest or if the officer develops probable cause. Probable cause requires reasonable grounds to suspect a person has committed or is committing a crime and gives an officer the legal authority to search without consent.

Consent searches have consistently been decreasing from 12 in 2019, 8 in 2020 and 6 in

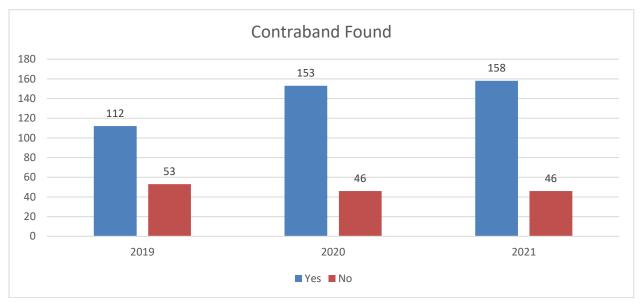

Hispanic drivers were search by consent three times or .014% of total searches. White drivers were search by consent 2 times or .009% and African American drivers were search by consent one time or .004%

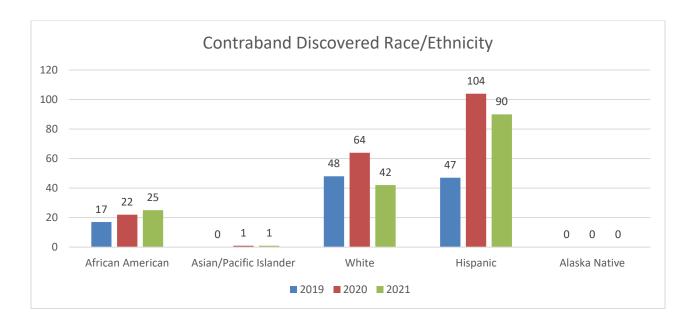

LPD Policy on (Search and Seizure, Consent) reinforces those officers should be deliberate when making search decisions:

Officers should be aware that overuse of the consent search can negatively impact the Department's relationship with our community and only request a consent search when they have an articulable reason why they believe the search is necessary and likely to produce evidence related to an investigation.

Searches resulting from motor vehicle stops productive rates.

Productive searches are searches where contraband is found (e.g., drugs or weapons). The chart below shows that, for all searches, productivity was 68% in 2019, 77% in 2020 and 77% in 2021.
