

Answers to RFQ Questions

1. I read through the document and could not find any mention of e-waste. Is used IT equipment disposal included in this RFP as well or is there a different process for that?? Currently the City of Lockhart has a city-run recycling center at 110 North Brazos Street that accepts e-waste and the city's solid waste provider picks up the dumpster. This RFQ is for selection of a procurement consultant for solid waste services. Once a consultant is selected, the solid waste services that will be included in the next solid waste contract will be identified.
